

This is a cool doc

GAME DEVELOPMENT ROLES

Written by Froothy

PROJECT LEADERS

Mytherial Leads -

Collective term for - Development Consultants, Directors, Heads, Project Coordinator, Co-Project Manager, Project Manager.

Project Manager(s) - have the responsibility of the planning and execution of a project. They decide the main direction of the rewritten project and how it will look finalised.

Role Requirements:

- Strong leadership, communication and cooperation skills
- Organisation and management skills (ability to use and understand tools which help in this area)
- A good understanding of the game development process from start to finish, and at least a basic understanding of each of the different departments and what they do (proper experience desired)
- 8/10 activity within the discord and the project
- 18+ age
- A clear and well thought out concept for the game they want to create
- Be willing to stick with the project and support it any way you can
- BE PASSIONATE ABOUT WORKING ON THE PROJECT

Responsibilities include:

- Making final decisions for the game direction
- Informing and providing clarity to all devs on what the project development will entail and what game we are creating (clear and

informative game design concept which can be easily read/understood) and making sure development is becoming the game it was designed to be

- Managing and checking in on all devs involved in the project and their individual progress and contribution in development
- Overseeing all development departments and making sure everything is running smoothly
- Creating tasks, assignments, to-do lists with deadlines and delegating/assigning those tasks to the Heads of the departments and to team members, keeping tabs on progress and making sure deadlines are met.
- Being present and informed on the project and maintaining good relationships between team members.
- Regularly update and openly communicate with all team members
- Creating and updating the project scope, including goals, milestones, roadmap for the year, and taking responsibility to ensure these goals are met, and development is progressing at a reasonable pace to successfully achieve these goals.
- Being your team's biggest cheerleader, and inspiring and motivating your team to success, while also making sure they are well cared for and feel involved and connected to you, their teammates and the project itself.
- Attending almost all VC meetings/events (if possible) and organising them when needed
- Help to review dev apps

Co-Project Manager(s) – have similar responsibilities as the Project Manager. They are responsible for assisting with final decisions for the game and helping with the planning and execution of the project.

Role Requirements:

- 18+ age
- Strong leadership, communication and cooperation skills
- Organisation and management skills (ability to use and understand tools which help in this area)

- A good understanding of the game development process from start to finish, and at least a basic understanding of each of the different departments and what they do (proper experience desired)
- 8/10 activity within the discord and the project
- Good understanding of Owner/Project Managers original game concept and the direction it should go
- Super strong relationship with the Project Manager
- BE PASSIONATE ABOUT WORKING ON THE PROJECT
- Willingness to stick with the project and support it any way you can

Responsibilities include:

- Assisting with making final decisions for the game direction
- Informing and providing clarity to all devs on what the project development will entail and what game we are creating (clear and informative game design concept which can be easily read/understood) and helping to steer development in the right direction
- Managing and checking in on all devs involved in the project and their individual progress and contribution in development
- Overseeing all development departments and making sure everything is running smoothly
- Creating tasks, assignments, to-do lists with deadlines and delegating/assigning those tasks to the Heads of the departments and to team members, keeping tabs on progress and making sure deadlines are met.
- Being present and informed on the project and maintaining good relationships between team members.
- Regularly update and openly communicate with all team members, including informing the Project Manager of everything they should be made aware of.
- Assisting with creating and updating the project scope, including goals, milestones, roadmap for the year, and taking responsibility to ensure these goals are met, and development is progressing at a reasonable pace to successfully achieve these goals.
- Filling in as a substitute for the Project Manager if/when needed
- Being your team's second biggest cheerleader, and inspiring and motivating your team to success, while also making sure they are well cared for and feel involved and connected to you, their teammates and the project itself.
- Attending almost all VC meetings/events (if possible) and organising them when needed

- Help to review dev apps

Heads(s) - focus their attention on a specific department that corresponds with the position they applied for. They are the leads for their department and instruct those who work in that specific department on what to do next. They provide a fine balance between the amount of work that's shared and they are expected to uphold their workload to help the project and team succeed.

Role Requirements:

- 18+ age
- Good leadership, communication and teamwork skills (Able to guide, manage and direct a team well in their dept)
- Demonstrate good organisation and productivity
- Proficient understanding and knowledge of their dept (the craft, the process, its requirements, and how its incorporated into a game)
- A decent understanding of the game development process from start to finish, and at least a basic understanding of each of the other departments and what they do
- 8/10 activity within the discord and the project
- Good understanding of Owner/Project Managers original game concept and the direction it should go
- Good relationships with the other Leaders and particularly the Project Managers, and be a highly trusted team member.
- BE PASSIONATE ABOUT WORKING ON THE PROJECT and show dedication and willingness to stick with the project for at least a while

Responsibilities include:

- Lead and guide their dept and the team within it
- Breakdown tasks/goals given to them by the Project Managers into smaller more specific assignments/tasks with deadlines, and properly assign and manage them within the team, checking to make sure it fits within the project scope and overall direction.
- Helping to steer direction specifically within their dept for the game. (Eg. Head of Art, helps to steer the direction of the art style within the game)
- Managing their dept and checking in with their teammates working on the tasks, updating the Project Managers on progress frequently.

- Informing the Project Managers/Leaders of any issues or concerns they may encounter with the project.
- Being present and informed on the project and maintaining good relationships between team members.
- Attending VC meetings/ organising dept specific meetings when necessary
- Help to review dev apps for their dept

Directors(s) - are the second-in-command to their Head. A Head can select a Director of their choice that corresponds with their position to help with their workload. While Directors are not much different position and workload-wise, they are expected to oversee their respective team and establish decisions in absence of their Head and learn throughout the position the responsibilities of becoming a Head including being open-minded about what they and their Head both want for the future of their team in order to allow them to succeed.

Role Requirements:

- 17+ age
- Good leadership, communication and teamwork skills (Able to assist with guiding, managing and directing a team alongside the Head in their dept)
- Demonstrate good organisation and productivity
- Proficient understanding and knowledge of their dept (the craft, the process, its requirements, and how its incorporated into a game)
- A decent understanding of the game development process from start to finish, and at least a basic understanding of each of the other departments and what they do
- 7/10 activity within the discord and the project
- Good understanding of Owner/Project Managers original game concept and the direction it should go
- Good relationships with the Project managers and other Leaders and particularly the Head of their dept, and be a well trusted team member.
- BE PASSIONATE ABOUT WORKING ON THE PROJECT and show dedication and willingness to stick with the project for at least a while
- Show willingness to learn and to understand their responsibilities as well as their Heads responsibilities to properly be prepared if they have to take over.
- Filling in as a substitute for their Head if/when needed

Responsibilities include:

- Assist with leading and guiding their dept and the team within it alongside the Head of the dept, and helping the Head where needed.
- Helping the Head of the dept breakdown tasks/goals given to them by the Project Managers into smaller more specific assignments/tasks with deadlines, and properly assign and manage them within the team, checking to make sure it fits within the project scope and overall direction.
- Helping to steer dept direction for the game (eg. Director of Art helps to steer the direction for the game's art style)
- Informing the Project Managers/Head of dept of any issues or concerns they may encounter with the project.
- Being present and informed on the project and maintaining good relationships between team members.
- Attending VC meetings
- Help to review dev apps for their dept

Consultant(s) - act as our "Guardian Angel", they are responsible for looking over our shoulder from time to time, observing and providing advice and direction in their area of expertise if we need help.

Role Requirements:

- 17+ age
- 5/10 activity within the server (more activity is preferred but not necessary for this kind of "advice giver" role)
- At least 3 years experience in their chosen field and proven proficient experience, understanding and knowledge within the game development space
- Decent guidance and teaching skills
- A good understanding of the game development process from start to finish, and a decent understanding of each of the other departments and what they do

Responsibilities include:

- Guiding the Leads and fellow teammates by providing as accurate advice as they can based on their own experience, knowledge and research.

- Being available to help when needed or pinged
- Regularly observing and "looking over our shoulder" while we work and promptly letting the Leads know when they see anything of concern.
- Adding to the game development discussions if possible in their chosen field

Admin(s) Aid with arranging the discord server, the branding of Mytherial, Recording events (such as meetings or QnAs), adding people to the team or letting them go when needed, and in general helping with the technical side of development.

Role Requirements:

- 18+ age
- 5/10 activity within the server (tho more activity is preferred, and need to be present for almost all events/meetings which need technical help)
- Good IT skills and technical understanding
- Up to date with proficient knowledge and experience with using discord and other various apps and tech tools
- A decent PC/laptop (no potato computers allowed for this role)
- Must be a well trusted team member
- Must be in the Fer.ever server as well

Responsibilities include:

- Fixing and using discord roles (including adding, removing, and changing roles)
- Fixing and using discord bots (including helping to write up or fix up msgs posted by bots)
- Recording meetings/events or keeping meeting notes and posting them in #update log
- Setting up events and mic/video checking beforehand
- Fixing up and making announcements in the main server
- Writing down dev apps into the doc and making the Leads aware of any new apps that may come our way, also providing your own input with app reviews.
- Dming individuals that need to be informed that they've either been accepted into the Mytheri.al team (providing the one time use Mytheri.al link, or declined (providing reason why if needed)

- Helping to organise server channels and categories, providing input and help to make them more neat and efficient to use throughout development
- Fixing up docs or posts made in the server by Leads (grammar checks, spelling, weird sentences that don't make any sense etc and also to make sure they are all up to date and accurate), and if you aren't able to fix it yourself, informing the person who sent the msg about the errors.
- Checking and making sure roles and anything else regarding Mytherial is correct in the Fer.ever server.

Mod(s) Responsible for keeping our server a safe and welcoming space, helps to deal with potential security issues as well as member conflict, reports and other moderation concerns.

Role Requirements:

- 18+ age
- 5/10 activity within the server (tho need to be present for potential threats, or serious issues in the server)
- Good IT skills and technical understanding
- Up to date with proficient knowledge and experience with using discord and other various apps and tech tools
- A decent PC/laptop (no potato computers allowed for this role)
- Must be a well trusted team member and must already be a mod (or previously was a mod) in Fer.ever.

Responsibilities include:

- Fixing and using discord roles (including adding, removing, and changing roles)
- Fixing and using discord bots (including helping to write up or fix up msgs posted by bots)
- Helping to organise server channels and categories, providing input and help to make them more neat and efficient to use throughout development
- Monitoring and observing server channels every so often
- Informing Leads of any suspicious behaviour or concerns from members that have arisen from the Fer.ever server that may need attending to in the dev server as well.

- Addressing and dealing with security issues or issues with team members
- Attending to any reports made or any moderation concerns raised
- Making sure the dev server is protected as well as it can be and informing Project Managers if you have any concerns

PROJECT DEVELOPER ROLES

Developer(s) - the cream cheese filling of the whoopie pie! Those who help build the game in various different aspects and who help contribute their skills and experience in an area of game development.

Role Requirements:

- 18+ age (existing devs under this age are welcome to stay)
- Had a application reviewed by Leads and accepted through the developer application form
-

Responsibilities include:

- Work on assignments given
- Give regular updates on progress to their respective Head
- Keep themselves updated with the current roadmap
- Attend meetings when able to
- Be alert and responsive to pings where we may need you
- Notify a Myth Head of any issues, or concerns you may have, or if you'll be going away for a while and cannot respond/contribute
- Be cooperative and respectful with other team members and bring your best attitude to the team

Game Designer(s) - are responsible for bringing all aspects of development together and bringing a game to life. They take game concept ideas and make them into something playable, realistic (with the time and resources that we have), and help turn it into an overall fun experience for the players. They are also the rule-makers of the project and help to create mechanics, systems and features that fit within the game's world and mesh well all together.

Game Design Categories:

- Mechanics/Systems
- Level Design
- Combat Design
- Gameplay Loop
- Economics
- Monetization
- Feature Design

Responsibilities include:

Writer(s) - are responsible for narratively building the game's world, creating the story, dialogue, characters and the game's narrative progression.

Game Writing Categories:

- NPC Dialogue/Character Scripts
- Item Descriptions/Creations
- Main Storyline/Main Quest
- Side Quests
- Environment World Building
- Characters/NPCs World Building

Responsibilities include:

Artist(s) - are responsible for visually building the game's world, working alongside the writer's creations. They turn words into visuals and concept art that can then be turned into 3d creations.

2D Game Art Categories:

- Avatars/NPCS
- Background Art
- Environments
- Architecture
- Props

Responsibilities include:

3D Modeller(s) - are responsible for capturing the essence of the 2d art into a 3d world, turning them into 3d assets which can then be directly used in the game

3D Game Art Categories:

- Avatars/NPCS
- Environments
- Architecture
- Props

Responsibilities include:

3D Animator(s) - are responsible for the movement of 3d creations, animating them to become alive and full of life directly in the 3d world.

Game Animation Categories:

- VFX/2D Animation
- Environment
- Avatar/NPC
- Props

Responsibilities include:

Programmer(s) - are the backbone of any game. They take the design of the game and code it into something that is playable and fully functional as a game.

Game Coding Categories:

- C# Scripting
- Unity Engineering
- Security Implementation

Responsibilities include:

Unity Engineer(s) - are the lego builders of the game world. They take all aspects of development and put them all together into the Unity engine.

Responsibilities include:

Sound Engineer(s) - are responsible for all the sound in the game. They immerse themselves into the world that's being created and audibly create music that would fit in that world, or sound effects that would come out of that creature or UI element.

Sound Engineering Categories:

- Sound Effects (SFX)
- Background Music
- Background/Environmental Ambience

Responsibilities include:
